

DIVEST LA

\$8 BILLION. We now have a number.

The City of LA has at least \$8 billion in depositories with Wells Fargo.

LA must sever ties with Wells Fargo and stop the **fraud,**
the targeting of the elderly and communities of color,
the funding of private prisons &
the Dakota Access Pipeline.

EIGHT BILLION is the amount we want our city to DIVEST from Wells Fargo. But 8 billion is something so much greater than a number. 8 billion symbolizes the TOLL that greed has taken on our evolution as a species. 8 billion defined as the MOMENT we agreed. 8 billion ends an era. 8 billion starts the NEW.

IMAGINE if there's a way to change the system for people and planet over profit. **THERE IS.** A city-wide revolution. The simple truth is, the system is broken, and it's time for cutting edge local solutions: for Cities to DIVEST from unethical corporations and REINVEST in our communities and our environment. This is the evolution of revolution.

THE FACTS:

- 1) LA has funds in banks guilty of fraud, predatory lending, and funding DAPL and KXL.
- 2) LA invests in Chevron, Exxon, Goldman Sachs, Wells Fargo, Chase, Phillip Morris, and other corrupt corporations.
- 3) LA paid over \$100 million in bank fees in 2016.

THE PLAN:

- 1) DIVEST LA from Wells Fargo and all unethical institutions and REINVEST into local communities and banks with a clean record.
- 2) DIVEST LA from corrupt companies and into socially responsible ones and renewable energy.
- 3) LA INVESTS their time into the possibility of creating a public bank, that serves only us, the people and our economy; not private interests.

It's time for us to take **BOLD** action. It's time to make **CITIES** accountable to the people.

Reinvest for our future.
